GROUND/OPERATIONAL

Safehouses for SOB Agent Training

ACTION REQUIRED: See paragraph 5 below.

1. We are forwarding with this dispatch a brief report on the Munich safehouses our agents have been using in the recent past.

2. I think we are all agreed that the W/T training can only be done securely and efficiently in Germany and that Munich is the most suitable area. The only question for our purposes is what premises should actually be used. Ideally, we should like to have a separate house for each agent which cannot be attributed to a U. S. Government agency, and which has not been compromised by other agent activity. We realize that this ideal is hardly possible. However, it should not prove impossible to have a single safehouse put at our disposal by MOB which has not been compromised and which cannot be attributed to the U. S. Government without a certain amount of investigation.

3. From our attached report, it will be noted that over one-half of the work has been accomplished in McGraw Kaserne, so that any person knowing our agent and seeing him enter this U. S. Military establishment, could assume that he was working in some way for the U. S. Government. We have been able to protect the agent's identity when entering into and while present in the Kaserne by furnishing them with false identification. Those marked with an asterisk have been provided with false German work cards, while GRIMPASTE has been given papers identifying him as an American.

4. In one case, an agent has been trained in a safehouse which we believe had been used in a CE case which involved some degree of publicity in the local papers. This was Heckenrosetstr. 16, a general CE holding area.

5. We are writing this dispatch only to explore the possibility of perhaps providing ourselves with more ideal quarters for our needs. Some consideration should be given toward making funds available from GROUND for this purpose. If MOB's situation is such that a safehouse cannot be supplied

us which is more or less secure outside of the Kaserne, then we shall certainly continue using the facilities available. We welcome comments on this matter from both MOB and COS, Vienna.
